# **Q1-2018 Veterinary Services Update**

### **Market Update**

Due to favorable industry demand trends and an attractive market profile, veterinary services continues to be one of the most highly sought-after investment areas for private equity firms seeking to employ a "buy-and-build" strategy. The sector's heavy market fragmentation has allowed consolidators to quickly gain scale by leveraging capital brought by private equity investors to acquire leading specialty, emergency, and general practices, and deal flow remains strong even as buyers have been forced to offer valuations at historically high levels. New consolidators continue to emerge in the market, expanding the available options for veterinarian shareholders seeking back-office support and personal liquidity, and we expect this trend to continue throughout the remainder of 2018.

#### **Private Equity-Backed Consolidators**

| <u>Company</u>                 | Private Equity Partner             |
|--------------------------------|------------------------------------|
