# Q1-2018 Veterinary Services Update

### **Market Update**

Veterinary Services has continued to remain an area of interest for many investors looking to deploy a "buy and build" strategy. Due to heavy market fragmentation, investors can quickly gain scale by leveraging capital resources from private equity investors to acquire emergency, specialty and general practices. Despite increasing investor interest, there are only a few quality platforms in the sector creating high valuations for operators of a sizeable practice. Southern Veterinary Partners was the most active group this quarter completing two investments during the month of May. We continue to see an evolving number of new consolidators emerging as the available options for veterinarian shareholders seeking improved infrastructure and personal liquidity drives transaction trends forward throughout the remainder of 2018.
